TRILOGY BIOLOGY
PAPER 2

PERSONAL LEARNING
CHECKLISTS

2022

| AQA TRILOGY Biology (8464) from 2016 Topic T4.5 Homeostasis and response | | | | |
|--|---|---|---|---|
| Topic | Student Checklist | R | A | G |
| 4.5.1 Homeostasis | Describe what homeostasis is and why it is important stating specific examples from the human body | | | |
| | Describe the common features of all control systems | | | |
| 4.5.2 The human nervous system | State the function of the nervous system and name its important components | | | |
| | Describe how information passes through the nervous system | | | |
| | Describe what happens in a reflex action and why reflex actions are important | | | |
| | Explain how features of the nervous system are adapted to their function, including a reflex arc (inc all types of neurone and the synapse) | | | |
| | <i>Required practical 7: plan and carry out an investigation into the effect of a factor on human reaction time</i> | | | |
| 4.5.3 Hormonal coordination in humans | Describe the endocrine system, including the location of the pituitary, pancreas, thyroid, adrenal gland, ovary and testis and the role of hormones | | | |
| | State that blood glucose concentration is monitored and controlled by the pancreas | | | |
| | Describe the body's response when blood glucose concentration is too high | | | |
| | Explain what type 1 and type 2 diabetes are and how they are treated | | | |
| | HT ONLY: Describe the body's response when blood glucose concentration is too low | | | |
| | HT ONLY: Explain how glucagon interacts with insulin to control blood glucose levels in the body | | | |
| | Describe how water, ions and urea are lost from the body | | | |
| | Describe the consequences of losing or gaining too much water for body cells | | | |
| | HT ONLY: Recall that protein digestion leads to excess amino acids inside the body and describe what happens to these | | | |
| | Describe how the kidneys produce urine | | | |
| | HT ONLY: Describe the effect of ADH on the permeability of the kidney tubules and explain how the water level in the body is controlled by ADH | | | |
| | Describe how kidney failure can be treated by organ transplant or dialysis and recall the basic principles of dialysis | | | |
| | Describe what happens at puberty in males and females, inc knowledge of reproductive hormones | | | |
| | Describe the roles of the hormones involved in the menstrual cycle (FSH, LH and oestrogen) | | | |
| | HT ONLY: Explain how the different hormones interact to control the menstrual cycle and ovulation | | | |
| | Describe how fertility can be controlled by hormonal and non-hormonal methods of contraception (giving specific examples from the spec) | | | |
| | HT ONLY: Explain how hormones are used to treat infertility, inc the steps in IVF | | | |
| | HT ONLY: Evaluate the risks and benefits of fertility treatments | | | |
| | HT ONLY: Describe the functions of adrenaline and thyroxine in the body, and recall where they are produced | | | |
| | HT ONLY: Explain the roles of thyroxine and adrenaline in the body as negative feedback systems | | | |
| 4.5.4 Plant hormones | <i>Required practical 8: investigate the effect of light or gravity on the growth of newly germinated seedling</i> | | | |
| | HT ONLY: Explain the use of plant growth hormones are used in agriculture and horticulture (auxins, ethene and gibberellins) | | | |

| AQA TRILOGY Biology (8464) from 2016 Topic T4.6 Inheritance, variation and evolution | | | | |
|--|---|---|---|---|
| Topic | Student Checklist | R | A | G |
| 4.6.1 Reproduction | Describe features of sexual and asexual reproduction | | | |
| | Describe what happens during meiosis and compare to mitosis | | | |
| | Describe what happens at fertilisation | | | |
| | Describe the structure of DNA and its role in storing genetic information inside the cell | | | |
| | Explain the term 'genome' and the importance of the human genome (specific examples from spec only) | | | |
| | Describe how characteristics are controlled by one or more genes, including examples | | | |
| | Explain important genetic terms: gamete, chromosome, gene, allele, genotype, phenotype, dominant, recessive, homozygous and heterozygous | | | |
| | Explain and use Punnet square diagrams, genetic crosses and family trees | | | |
| | HT ONLY: Construct Punnet square diagrams to predict the outcomes of a monohybrid cross | | | |
| | Describe cystic fibrosis and polydactyly as examples of inherited disorders | | | |
| | Evaluate social, economic and ethical issues concerning embryo screening when given appropriate information | | | |
| | Describe how the chromosomes are arranged in human body cells, including the function of the sex chromosomes | | | |
| | Explain how sex is determined and carry out a genetic cross to show sex inheritance | | | |
| | | | | |
| 4.6.2 Variation and evolution | Describe what variation is and how it can be caused within a population | | | |
| | Describe mutations and explain their influence on phenotype and changes in a species | | | |
| | Explain the theory of evolution by natural selection | | | |
| | Describe how new species can be formed | | | |
| | Describe what selective breeding is | | | |
| | Explain the process of selective breeding, including examples of desired characteristics and risks associated with selective breeding | | | |
| | Describe what genetic engineering is, including examples, and how it is carried out | | | |
| | Explain some benefits, risks and concerns related to genetic engineering | | | |
| | HT ONLY: Explain the process of genetic engineering, to include knowledge of enzymes and vectors | | | |
| 4.6.3 The development of understanding of | Describe some sources of evidence for evolution | | | |
| | Describe what fossils are, how they are formed and what we can learn from them | | | |
| | Explain why there are few traces of the early life forms, and the consequences of this in terms of our understanding of how life began | | | |
| | Describe some of the causes of extinction | | | |
| | Describe how antibiotic-resistant strains of bacteria can arise and spread (inc MRSA) | | | |
| | Describe how the emergence of antibiotic-resistant bacteria can be reduced and controlled, to include the limitations of antibiotic development | | | |
| 4.6.4 Classification | Describe how organisms are named and classified in the Linnaean system | | | |
| | Describe and interpret evolutionary trees | | | |
| | Explain how scientific advances have led to the proposal of new models of classification, inc three-domain system | | | |

| AQA TRILOGY Biology (8464) from 2016 Topic T4.7 Ecology | | | | |
|--|---|---|---|---|
| Topic | Student Checklist | R | A | G |
| 4.7.1 Adaptations, interdependence and competition | Recall what an ecosystem is | | | |
| | Describe which resources animals and plants compete for, and why they do this | | | |
| | Explain the terms 'interdependence' and 'stable community' | | | |
| | Name some abiotic and biotic factors that affect communities | | | |
| | Explain how a change in an abiotic or biotic factor might affect a community | | | |
| | Describe structural, behavioural and functional adaptations of organisms | | | |
| | Describe what an extremophile is | | | |
| 4.7.2 Organisation of an ecosystem | Represent the feeding relationships within a community using a food chain and describe these relationships | | | |
| | Explain how and why ecologists use quadrats and transects | | | |
| | Describe and interpret predator-prey cycles | | | |
| | <i>Required practical 9: measure the population size of a common species in a habitat. Use sampling to investigate the effect of one factor on distribution</i> | | | |
| | Describe the processes involved in the carbon cycle | | | |
| | Describe the processes involved in the water cycle | | | |
| 4.7.3 Biodiversity and the effect of human interaction on ecosystems | Describe what biodiversity is, why it is important, and how human activities affect it | | | |
| | Describe the impact of human population growth and increased living standards on resource use and waste production | | | |
| | Explain how pollution can occur, and the impacts of pollution | | | |
| | Describe how humans reduce the amount of land available for other animals and plants | | | |
| | Explain the consequences of peat bog destruction | | | |
| | Describe what deforestation is and why it has occurred in tropical areas | | | |
| | Explain the consequences of deforestation | | | |
| | Describe how the composition of the atmosphere is changing, and the impact of this on global warming | | | |
| | Describe some biological consequences of global warming | | | |
| | Describe both positive and negative human interactions in an ecosystem and explain their impact on biodiversity | | | |
| | Describe programmes that aim to reduce the negative effects of humans on ecosystems and biodiversity | | | |
